Product Usage

The frame of this instrument is made of metal .Its model is beautiful, and it has the advantages of small volume, low weight,large capacity,low noise,high efficiency and so on.

It can be used in hospitals and biochemical labs for qualitative analysis of serum, urea and plasma.

Features

- Separating the liquid from the solid particles or the liquid mixture of different density;
- Equipped with speed and timer control;
- Widely used in the laboratory, medical, chemistry and so on.

Low speed Laboratory centrifuge

800 electric centrifuge is widely used in hospitals, chemical and Biological Chemistry Laboratory for serum, plasma, immune qualitative analysis experiment. Has beautiful shape, large capacity, small volume, complete function. Its performance is stable, the speed is adjustable and can automatically adjust the balance, low temperature, high efficiency and wide applicability and advantages.
